**Integration Technologies Group, Inc. – (ITG)**

<b>Expert Consultant - Senior</b>	
<b>Functional Description:</b>	Identifies business improvement opportunities, develops solutions, manages initiatives, and identifies resources and disciplines to execute the process. Applies business process improvement methods and tools to promote continuous improvement. Coaches and mentors on the application of business process improvement methodology and tools in one-on-one and group settings to supplement and reinforce skills attained during training. Develops action plans, revisions, and reinforcement based upon audit results, and monitors execution of plans. Identifies any gaps that may exist relative to Best Practices and assists in developing a risk mitigation strategy and roadmap to address those gaps in a planned, strategic, and cost-efficient manner
<b>Required Education:</b>	Bachelors Degree
<b>Required Experience:</b>	2 Years
<b>Substitutions:</b>	Bachelor’s Degree in business, marketing, or technical field, or equivalent training and work experience

<b>Software Developer Applications - Senior</b>	
Functional Description:	Develop, create, and modify general computer application software or specialized utility programs. Analyze computer user needs and develop software solutions. Design software or customize software for client use with the aim of optimizing IT operational efficiency. May analyze and design computer databases within an application area, working individually or coordinating database development as part of a team. May supervise computer programmers. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short- term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.
<b>Required Education:</b>	Bachelors Degree
<b>Required Experience:</b>	5 Years
<b>Substitutions:</b>	Bachelor’s degree in an associated technical discipline. In rare circumstances, education and/or experience requirements may be decreased or waived if the individual has an extraordinary educational background or uniquely applicable experience or highly specialized knowledge

<b>Configuration Management Specialist- Mid</b>	
<b>Functional Description:</b>	Responsible for recommendation of configuration management solutions which meet customers' requirements. To include but, not limited to: Configuration Management of Databases, Operating System Configuration Management, Predictive and Preventive Maintenance, Secure Configuration Management, Software Configuration Management Configuration Maintain documentations for reference purposes to educate staff on configuration policies and practices. Plan and coordinate system configuration activities for satisfactory completion. Assist in developing tools to support daily configuration management activities, assist in designing of automation tools in the support of configuration procedures, assist in configuration audits and implementation of audit recommendations. Analyze, communicate, and resolve configuration problems and enforce configuration management policies and practices. A bachelor's degree or equivalent additional experience is required for this position. Minimum of two (2) years' experience required
<b>Required Education:</b>	Bachelors Degree
<b>Required Experience:</b>	2 Years
<b>Substitutions:</b>	A bachelor's degree or equivalent additional experience is required for this position.

<b>Help Desk Specialist - Mid</b>	
<b>Functional Description:</b>	Respond to and diagnose problems through discussions with users. Maintain call logs (if necessary) and evaluate problems. Experience supporting and installing LAN-based application software. Experience supporting various operating systems and business COTS packages, hardware troubleshooting ability including printers, PC's, (networked and stand alone), and be able to troubleshoot LAN log in and connectivity. Help Desk Specialists generally supplement an organization's existing needs. May work individually on small projects or support a team to complete more complex projects.
<b>Required Education:</b>	Associates Degree
<b>Required Experience:</b>	0 Years
<b>Substitutions:</b>	Additional 2 years experience and A high school diploma. May require one or more of the following certifications: A+ CE, CCNA Security, Network CE, or other 8570 or like certifications

<b>PC Deskside Technician - Mid</b>	
<b>Functional Description:</b>	Diagnose and repair computer problems. May require manipulation of software or hardware rearrange program steps and provide other adjustments. Perform component level troubleshooting. Swap out parts when necessary, responsible for carrying out work on large more complex projects independently or is assigned to provide direction on large projects to less senior personnel.
<b>Required Education:</b>	Associates Degree
<b>Required Experience:</b>	4 Years
<b>Substitutions:</b>	Additional 2 Years experience with a high school diploma. May require one or more of the following certifications: A+ CE, CCNA Security, Network CE, or other 8570 or like certifications.

<b>Business Intelligence Analyst</b>	
<b>Functional Description:</b>	Defines systems scope and objectives based on both user needs and a thorough understanding of business systems and customer requirements. Ensure the proposed technical and business solutions meet the customer's objectives for the work effort. Reviews, analyzes, and evaluates business systems and user needs. Provide guidance with planning and prioritization of business analysis activities in support of large project and support efforts.
<b>Required Education:</b>	Bachelors Degree
<b>Required Experience:</b>	3 Years
<b>Substitutions:</b>	Bachelor's degree in an associated technical discipline. In rare circumstances, education and/or experience requirements may be decreased or waived if the individual has an extraordinary educational background or uniquely applicable experience or highly specialized knowledge

<b>Logistician II</b>	
<b>Functional Description:</b>	Responsible for Warehouse Management, Inventory Control, Operations Management, Customer Service and/or, organizing spare parts and inventory of system components directly related to customer's IT inventory (Including but not limited to workstation hardware/software, peripherals and consumable supplies). May provide operational support to meet the customer needs by employing effective warehouse management techniques including inventory analysis and reporting in accordance with established client procedures and government requirements. Plans, develops and executes logistic/inventory program activities from conceptual stage through life cycle of product to the extent required. Develops and implements logistics/inventory program activities including technical documentation, provisioning, etc.; coordinates efforts of subcontractors and field service personnel; resolves logistics/inventory problems; and compiles data on standardization and interchangeability of parts to expedite logistic/inventory activities. This can include receiving, pre-packing, binning, picking, packing, shipping, tracking and inventory management for warehoused and fielded equipment.
<b>Required Education:</b>	Bachelors Degree
<b>Required Experience:</b>	2 Years
<b>Substitutions:</b>	A bachelor's degree or equivalent additional experience is required for this position.

<b>Network and Computer Systems Administrator</b>	
<b>Functional Description:</b>	Install, configure, and support an organization's local area network (LAN), wide area network (WAN), and Internet systems or a segment of a network system. Monitor network to ensure computer network availability to all system users and may perform necessary maintenance to support network availability. May monitor and test Web site performance to ensure Web sites operate correctly and without interruption. May assist in network modeling, analysis, planning, and coordination between network and data communications hardware and software. May supervise computer user support specialists and computer network support specialists. May administer network security measures. Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.
<b>Required Education:</b>	Bachelors Degree
<b>Required Experience:</b>	2 Years
